

THE INTELLIGENT CLOUD PHONE SYSTEM FOR THE MODERN PHILIPPINE BUSINESS

Build Trust From the First Click to the Final Call.

Ekhos Business Voice connects your website, social media pages, and all your branches across the Philippines into one easy-to-use phone system—without wires, old hardware, or complicated setup. Give your customers a smooth, professional experience in every conversation—and turn calls into lasting relationships.

The Problem: A Messy, Disconnected Customer Experience

Customers today expect fast, clear, and helpful service. But many businesses still face problems like:

SCATTERED COMMUNICATION

Landlines in one place, mobile phones in another, and messages coming from everywhere—hard to manage, and harder for customers.

INCONSISTENT SERVICE

Customers get a different experience calling your Manila office than your Cebu branch.

OLD-SCHOOL SYSTEMS

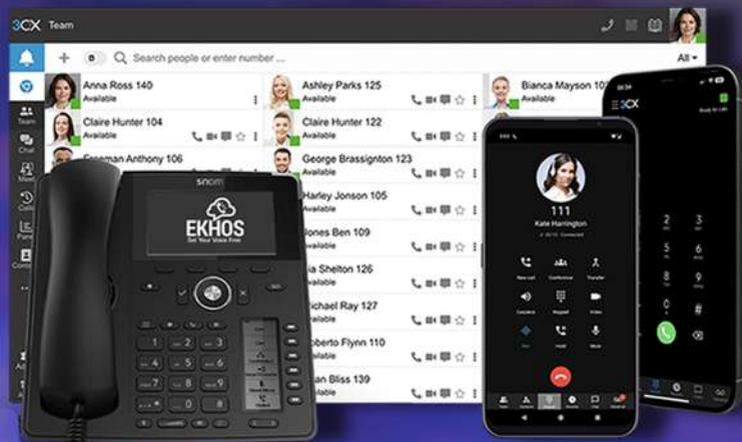

Traditional phone systems (PABX) are expensive, hard to update, and not made for remote or hybrid teams.

All this leads to missed calls, unhappy customers, and lost sales..

The Solution: One Connected System With Ekhos

Ekhos Business Voice is a modern, all-in-one phone system in the cloud. It brings all your communications together so you can give your customer a **Connected, Consistent, and Intelligent** experience -no matter where you are.

CUSTOMER EXPERIENCE

CONNECTED

Calls, chats, and team communication—all in one platform.

CONSISTENT

Same professional experience, whether they call your main office or a branch in the province.

INTELLIGENT

Gain insights from conversations and streamline workflows with modern tools.

Feature	Description	Business Benefits
Cloud PBX Platform	Enterprise-grade features: IVR, Call Queues, Voicemail-to-Email, no on-site hardware.	Reduce costs, simplify management, and present a professional
Softphone App	Call, chat, and check availability—all from your phone or computer (Windows, Mac, Android, iPhone).	Empower your team to work from anywhere, on any device.
Managed SIP Trunks	High-quality, reliable voice channels for all your inbound and outbound calls. We manage the technical side so you get crystal-clear audio.	Superior call quality and reliability you can count on.
Nationwide Virtual Number	Establish a professional local presence with a single Manila virtual number that connects all your operations.	A single, easy-to-remember number for your customers to build brand recall.
Flat-Rate Nationwide Calling	Enjoy predictable, unmetered outbound calls to any landline or mobile number in the Philippines.	Eliminate surprise phone bills and control your budget with confidence.
Advanced Call Management	Smart call routing by time, caller ID, or menu selection to the right person/department.	Improve first-call resolution and reduce customer wait times.
Future-Ready Integrations	Integrations for WhatsApp, Messenger, Microsoft Teams, and AI-powered analytics.	Stay ahead of the curve and connect with customers on their preferred channels.
